

Animals don't need to suffer anymore. Haven't they done enough to help our species? We humans need to appreciate life and this includes all life because no animals need to suffer like these animals. Why don't you consider using genes and not animals because our technology has made this possible. Is it because you just want to torture the animals and have no sympathy for them? Do you think that animals would use you for experiments? We humans are lucky that we have the ability to communicate the way we can and we should not take advantage of this. Animals have done enough and they need to be free from human harm. WE NEED TO GIVE ANIMALS SOMETHING BACK FOR HELPING MANKIND! I urge you to help end animal suffering and I hope that you will do it soon. Thank you for taking the time for reading this letter.
